- Executive Summary
 - Introduction
 - Methodology
 - Results
 - Visualization – Charts
 - Dashboard
 - Discussion
 - Findings & Implications
 - Conclusion
 - Appendix

EXECUTIVE SUMMARY

- The IT field a diverse field requiring a wide skill set. Workers in the IT area must know different programming languages, databases, server platforms and web development.
- This project examines three areas:
 - Current Technology Usage
 - Future Technology Trends
 - Demographics
- Show the top languages in use
- Identify the top databases used by industry
- Show how age and gender impact the IT sector

INTRODUCTION

- What IT skills are in use and skills that will be in demand?
 - What programming languages are in demand?
 - What database skills are required?
 - Which web development platforms are in use?
- Data was collected from several different sources:
 - Surveys
 - Job postings
 - Educational statistics
- This analysis was conducted by a Data Analyst working independently, gathering data from the internet by web scraping and downloading database.

METHODOLOGY

- Data source: Stack Overflow. The databases used:
 - m5_survey_data_demographics.csv
 - m5_survey_data_technologies_normalixed.csv
- Data was cleaned and normalized by:
 - Removing blank lines and cells
 - Correcting spelling
 - Removing data outliers
- After cleaning, the databases were used to:
 - Determine the top languages and databases in use
 - Show the top operating platforms and web design tools
 - Show the gender, age and education distributions

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript is the most used and most desired programming
- The top four languages are common to both lists
- There is little change between the desire for new languages and the languages in use.

Implications

- Four languages are used by most developers
- At the present time there is not much change in the use and the desire for programming languages
- Most programming is web based

DATABASE TRENDS

Current Year

Top Ten Databases Used by Respondents

Next Year

Top Ten Databases Respondents want to Learn

DATABASE TRENDS

Findings

- MySQL and Microsoft SQL Server are the top two databases used by respondents
- There are five databases in demand: MongoDB, Elasticsearch, PostgreSQL, Microsoft SQL Server and MySQL

Implications

- Overall, database usage is not dominated by any one product
- MongoDB, Elasticsearch, and PostgreSQL are set to compete with MySQL and Microsoft SQL Server

AGE, GENDER AND EDUCATION LEVEL

Respondent by Age and Gender

Respondent by Gender and EdLevel

DEMOGRAPHICS TRENDS

Findings

- Men far outnumber women in the IT field
- There is a steep decline in the IT workforce after the age of 28
- Most workers have Bachelor's or Master's degrees

Implications

- Women are under-represented in the IT workforce
- Men and women have the highest number of employees at age 28
- The IT field is mostly men with bachelor's or master's degrees

DASHBOARD

CURRENT TECHNOLOGY USAGE

Current Technology Usage

Top Ten Languages Used by Respondents

Top Ten Databases Used by Respondents

Platforms Used by Respondents

Top Ten Web Frames Used by Respondents

FUTURE TECHNOLOGY TRENDS

Future Technology Trend

Top Ten Languages Respondents want to Learn Next Year

Top Ten Databases Respondents want to Learn

Platforms Respondents want to Learn Next Year

Web Frames Respondents want to Work with Next Year

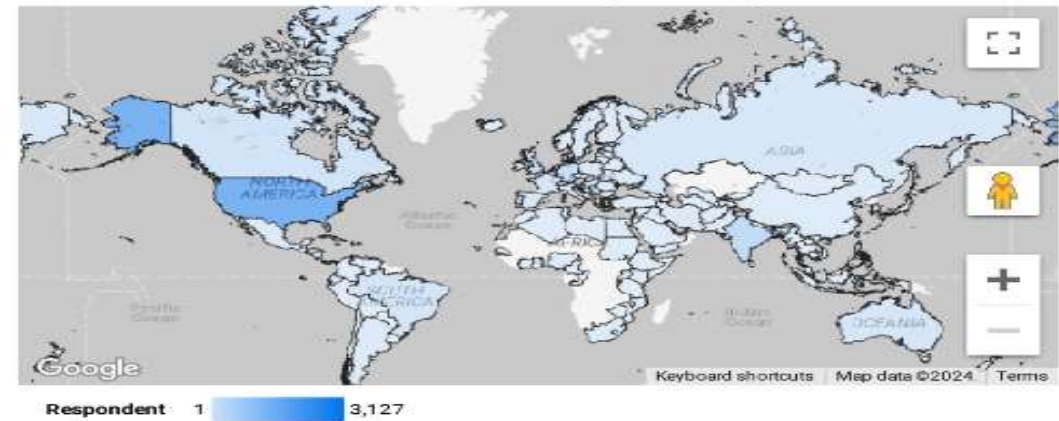

DEMOGRAPHICS

Gender by Record Count

Respondent Count by Country

Respondent by Age and Gender

Respondent by Gender and EdLevel

DISCUSSION

- IT skills in demand:
 - Programming languages:
 - JavaScript, HTML/CSS, Python, SQL, TypeScript
 - Database IDEs:
 - PostgreSQL, MongoDB, Redis, MySQL, Elasticsearch
 - Operating systems:
 - Linux, Docker, AWS, Windows, Android
 - Web frames:
 - React.js, Vue.js, Angular/Angular.js, jQuery, ASP.NET

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScript, PostgreSQL, and React.js are the most in-demand skills
- 28 is the median age for IT workers after which there is a steady decline in the workforce
- Women are under-represented in the IT field

Implications

- In-demand skills evolve over time
- There is a high rate of employee turnover
- Efforts should be made to interest women in the IT field

CONCLUSION

- The IT field is dynamic
- Most jobs require at least some college
- The workforce is young with rapid turn-over
- Women are vastly under-represented
- A wide variety of skills are needed

APPENDIX

- Include any relevant additional charts, or tables that you may have created during the analysis phase.
